## SUMMARY

Software Development student with hands-on experience in application development using Python, JavaScript, HTML, and CSS. I have worked on academic projects involving RESTful APIs, data processing, and interactive web applications, with a strong emphasis on clean, reliable, and well-structured code. I enjoy collaborating with others, continuously learning new technologies, and applying strong problem-solving skills to real-world software challenges.

## EDUCATION

Software Development (Advanced Diploma)

Mohawk College, Ontario, Canada

Currently Enrolled

- Coursework includes programming fundamentals, web development, databases, and software design

## ACADEMIC PROJECTS & PRACTICAL EXPERIENCE

- Developed multiple academic projects involving backend and frontend integration using Python, RESTful APIs, HTML, CSS, and JavaScript
- Implemented full CRUD functionality in web applications and worked with structured data formats such as JSON and CSV
- Designed and built responsive user interfaces using Bootstrap and applied UI/UX principles learned through coursework
- Gained hands-on experience with version control using Git and GitHub throughout project development
- ArabicLingo - Educational iOS application built with Objective-C as a self-directed learning project and currently in development

## KEY SKILLS

- **Programming Languages (Academic)**  
C#, .NET, Python, Java, JavaScript, PHP
- **Web Technologies**  
HTML5, CSS3, Bootstrap, React
- **Programming Languages (Self-Learning)**  
Objective-C, Swift, Visual Basic
- **API & Backend Concepts**  
RESTful APIs, CRUD operations, structured data handling
- **UI/UX**  
Usability, accessibility, and user-centered design principles
- **Databases**  
MySQL, MongoDB, PostgreSQL
- **Soft Skills**  
Problem-solving, analytical thinking, communication, teamwork
